

inpen[®]

No more worry remembering the details.

The logbook displays last dose, average dose size, tracks overrides, and displays total daily dose. It also includes a daily summary of the last 90 days of insulin injections, blood glucose levels, and carbohydrate intake. All your info in one place.

Logbook

inpen[®]

No more guesswork on your insulin dosing.

The dose calculator automatically captures insulin on board and factors it into dose advice to help avoid insulin stacking. A correct dose is recommended based on current blood glucose and carbohydrate intake using your individualized settings.

Dose Calculator

Simplify your diabetes care plan.

Smart Insulin Delivery

inpen[®]

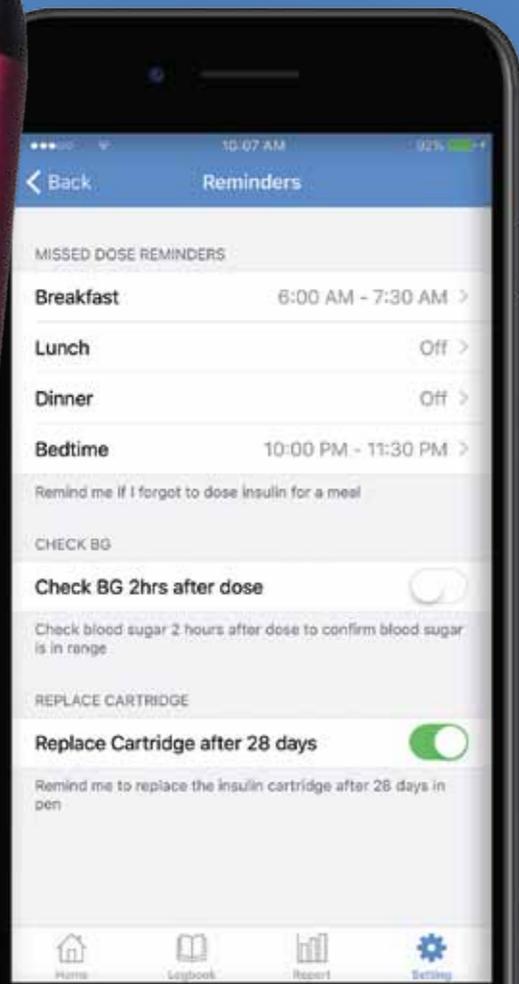

A reusable pen injector paired with an intuitive smartphone interface.

inpen®

Have you ever forgotten to bolus for a meal?

The InPen system includes dose reminders for breakfast, lunch, dinner, and/or bedtime; reminders to check blood glucose are optional. It also assists in protecting your insulin with temperature and age alerts. Help ease the challenges of insulin therapy with these alerts and reminders.

Dose Reminders

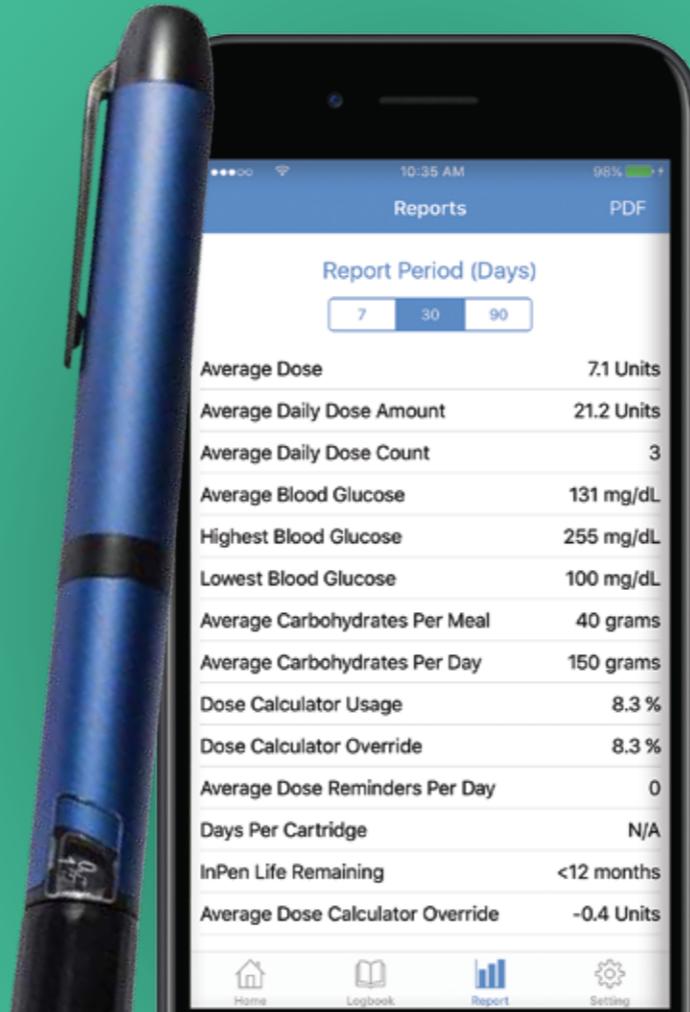

inpen®

Easy reporting for you and your provider.

Reporting lets you easily share your therapy summary with your healthcare provider or care givers. Reports can include daily average insulin dosing, carb intake, and blood glucose averages. See when insulin is given and when injections are missed. Convert reports to convenient PDF files to review, so you always see the big picture when adjusting your care plan.

Reports

inpen®

With InPen, you live your life— it takes care of the details.

InPen combines Bluetooth® technology and an easy-to-use smartphone app to provide a simple solution to the constant tracking, monitoring, and calculating necessary for successful insulin therapy.

The InPen system is to be used with U-100 Humalog® or Novolog® insulin. Indicated for persons aged 12 and older.
